TUES JUL 16	9:30	44 F		JS

No need to burden staff with checking fridges, freezers and incubators manually. It's too time consuming and subject to error.

"Of all the monitoring systems we looked at purchasing, Veriteq provided the best value...hands down!"

- Dorraine Reynolds, Pharmacy Director
Boys Town National Research Institute

Automate Temperature/Humidity Monitoring & Alarming with **viewLinc™**

- > Fail-safe records, automated
- > Alarm & notify when out of range
- > Connect to existing network
- > Wired and wireless connectivity
- > Add loggers in minutes
- > Easy to use
- > Personalized support: phone/email

- > Pharmacy
- > Refrigerators & Freezers
- > Blood & Tissue bank equipment
- > Labs, Clean Rooms, Ors
- > Incubators & Warmers

> Survey compliance > Safeguard products > Reduce staff workloads >

Data is protected and correct

Unlike other systems, each logger is equipped with highly stable sensors, large memory with auto back up and powerful 10-yr battery. Each is calibrated with a stated accuracy over 1 year—no other supplier can provide this assurance.

24/7 Alarming Assurance

Monitoring with viewLinc™ lets you set up alarming to fit your hospital needs—Email Alert, Text Messaging to Cell Phone or Pager, Flashing PC Alert, External Display and Dial Out Telephone Notification. Group loggers by pharmacy, lab, medication stations, for example, so each department sees only their area of responsibility.

Ease of Installation

- Easier to install and deploy than any other system
- Place the loggers, install the server software and begin monitoring
- Connects to your existing network with either wired or wireless connectivity
- Most systems can be deployed in-house—no additional outside costs

Compliant Reporting

Full audit trail and comprehensive, customizable documentation ensures compliance with all regulatory bodies including JCAHO surveys, CAP, FDA (21 CFR Part 11) and AABB audits.

Flexible and cost effective

- Eliminate manual checks on stored products
- Scale to your needs, from a single fridge to a campus, including widely distributed remote locations
- Expand without worrying about consulting or IT costs
- One site license allows access to data from any Internet browser by as many people you want on the system

Simple & Supported

Veriteq's service is responsive and resolute like no other in the industry. Whether doing an on-site setup or support via phone, email or WebEx, our customers say the nicest things about our service.

*"We really liked the lack of disruption during installation. The **set-up was a lot simpler** than other systems."*

- Leigh Anne Scott, Assistant Pharmacy Director
The University of Kansas Hospital
